d2w™ é aditivo oxibiodegradável certificado pela Associação Brasileira de Normas Técnicas (ABNT) em conformidade com normas brasileiras acreditadas pelo INMETRO.

Embalagens plásticas biodegradáveis **d2w™** são 100% recicláveis e são reutilizáveis quantas vezes precisar.

São fabricadas em mais de 90 países e são encontradas no mundo todo.

Depois de cumprir sua finalidade como embalagem, é iniciado o processo de degradação e o material se torna tão biodegradável quanto uma folha de árvore.

O índice de biodegradabilidade dos produtos fabricados com **d2w™** atingiu o fantástico índice de 88,86% em apenas 121 dias, segundo recente relatório da Eurofins em conformidade com normas EN 13432 e ISO EN 14855-1.

A vibrant scene of a party with people celebrating. The air is filled with a thick shower of multi-colored confetti (red, blue, green, yellow, purple). In the foreground, a man on the left is seen from the side, wearing a light blue shirt, with his arm raised holding a champagne glass. In the center, a woman is also holding a champagne glass. On the right, a man with a beard and dark hair, wearing a dark jacket over a white t-shirt, is smiling broadly with his arm raised, holding a champagne glass. Other people are visible in the background, some with their hands raised. The overall atmosphere is festive and celebratory.
